Objective

Database Developer with strong experience in designing, developing, and optimizing PL/SQL programs, database schemas, and REST-enabled data services using Oracle, PostgreSQL, and SQL Server. Proven expertise in ORDS-based API development, database migration, data validation, and performance optimization for enterprise applications. Seeking a Database Developer role where I can contribute to scalable, secure and high-performance database solutions.

Experience

Accenture

Nov. 2022 – Present

Custom Software Engineering Analyst

India

- Designed and modernized PL/SQL-based systems and converted them into RESTful data services using Oracle REST Data Services (ORDS). Developed complex PL/SQL packages, procedures, and JSON-based request/response handling for enterprise applications.
- Performed database migrations and schema validation across SQL Server and PostgreSQL.
- Developed and deployed secure REST APIs, Azure Functions, and background services integrating with SAP, SFTP systems, and external enterprise platforms.
- Designed, developed, and modernized enterprise-grade applications using ASP.NET MVC, .NET Core, and Azure services, supporting critical business workflows.
- Built and maintained CI/CD pipelines using Azure DevOps, enabling automated builds, deployments, and security scans with zero-downtime releases. Collaborated with cross-functional teams (QA, DevOps, Business Analysts) in Agile/Scrum environments to deliver high-quality, scalable solutions.

Projects

ORDS REST API Modernization

Halliburton

Oracle REST Data Services (ORDS), PL/SQL, SQL Developer, Postman, Oracle Database

- Modernized legacy PL/SQL packages into RESTful web services using Oracle REST Data Services (ORDS), enabling cloud-ready API access for enterprise applications.
- Developed and deployed 15+ ORDS modules across multiple business domains including Competency Management (CC), Crew Management, FCM, GRC, and HRRS systems.
- Created RESTful endpoints using ORDS.DEFINE MODULE, ORDS.DEFINE TEMPLATE, and ORDS.DEFINE HANDLER to expose existing PL/SQL package procedures as HTTP POST/GET services.
- Designed and implemented AppMod PL/SQL packages (.pks/.pkb) optimized for ORDS integration, handling competency assessments, job role assignments, security, user management, and evidence tracking.
- Implemented JSON-based request/response handling, transforming legacy stored procedures to consume JSON payloads and return structured data via RESTful APIs.

Database Migration

Halliburton

SQL Server, PostgreSQL

- Performed database migrations by extracting BACPAC backups from production SQL Server instances and deploying to target environments.
- Conducted schema validation analysis to identify incompatible objects and dependency issues preventing successful migration.
- Documented and remediated validation errors by selectively removing problematic database objects while preserving critical data structures.
- Coordinated backup file distribution through shared network locations and maintained comprehensive change logs for audit compliance.

University Affairs

Halliburton

ASP.NET Core 8.0, MVC,, JavaScript, PostgreSQL, Azure Blob Storage, Azure AD, Visual Studio, Git

- Developed enterprise ASP.NET Core 8.0 MVC application with 70+ controllers implementing RESTful patterns. Utilized dependency injection, repository pattern, and AutoMapper for clean architecture.
- Created strongly-typed Razor views with partial views and ViewComponents for modularity. Implemented AJAX operations returning JSON and partial views for dynamic UI updates. Integrated authentication with Microsoft Identity, custom authorization filters, and Azure services.
- Created administrative modules for board configuration, school master data, user rights management, and reporting dashboards. Managed multi-module functionality including job postings, info sessions, correspondence generation, and applicant tracking systems
- Integrated Azure Cloud Services: Blob Storage for file management.Built Microsoft Identity Platform authentication with Azure AD integration for secure access control

Tapfin

Halliburton

.NET 8, Azure Functions, Azure DevOps, SAP S/4HANA, PostgreSQL

- Developed and maintained an enterprise-grade Azure Functions application (.NET 8.0) that automates invoice processing workflows, integrating CSV file parsing, PDF generation using Aspose, and SAP S/4HANA invoice parking with hourly scheduled triggers.
- Architected and implemented secure API integrations with SAP HANA, Axway, and OpenText systems using OAuth token-based authentication, Azure Key Vault for secrets management, and comprehensive error handling with Application Insights monitoring.
- Designed and optimized a multi-layered data pipeline that processes vendor invoices from SFTP sources through SQL Server stored procedures, performing data validation, transformation, and real-time status tracking across development, QA, UAT, and production environments.
- Built robust CI/CD pipelines using Azure DevOps with automated deployment workflows, Fortify security scanning integration, and environment-specific configuration management ensuring zero-downtime releases.
- Implemented enterprise logging and notification systems using Microsoft Graph API for email alerts and Application Insights telemetry, reducing incident response time and providing comprehensive audit trails for financial invoice processing.

Skills

Databases: Oracle Database,PostgreSQL,SQL Server

Database Programming: SQL,PL/SQL,Stored Procedures, Packages (.pks / .pkb), Functions & Triggers, JSON Processing in PL/SQL

Data Engineering: Oracle REST Data Services (ORDS),Database Migration (SQL Server → PostgreSQL), Schema Validation & Dependency Analysis,Data Validation & Transformation,REST-based Data APIs

Tools: SQL Developer, SSMS, Postman,Visual Studio, Git

Programming: C#,JavaScript

DevOps: Microsoft Azure,Azure DevOps (CI/CD),Azure Functions (Basic),Azure Key Vault

Methodologies: Agile / Scrum

Certifications: .NET Developer Training, Azure DevOps Training, Microsoft Certified: Azure Data Fundamentals, Microsoft Certified: Azure AI Fundamentals, Microsoft Certified: Security, Compliance and Identity Fundamentals, Microsoft Certified: Azure Fundamentals

Education

RVR JC College of Engineering , Guntur

B.Tech in Electrical and Electronics Engineering

Graduation Date: May. 2022

CGPA: 8.01

Electrical Engineering graduate with a 8.01 CGPA, skilled in designing a electrical vehicle in such a way that we use engine and electricity as power source. The main objective of the project is to promote green mobility which reduces both air and noise pollution from transport.
